Loreen and Valerie,

I think I am accurate in answering Rick's questions as follows:

1. I have two concerns. The first is that some of my people, particularly Tony Tricker, are woefully over-committed. The second is that the consensus project, Maternal Smoking During Pregnancy, which I think is very important, has dropped off the map.
2. All of my projects have been approved, except for the literature review on molecular epidemiology, which has been eliminated.
3. I have no projects on hold.

If this is at odds with your understanding, please let me know.

Ted
